

Fig. 2

Fig. 2 is a perspective view of a tapered, elongated object 10, possibly a medical device or a biological structure. The object has a central longitudinal axis 12. The outer surface is marked with curved lines 18 and 20, and a dashed line 22. The inner surface is marked with curved lines 24 and 26, and a dashed line 28. The object is shown in a perspective view, with the front end 34 and the rear end 36.
